Environmental Management Policy

As a total solution provider in PCR molecular diagnostics, Seegene is committed to realizing a "world free from disease and future pandemics" through next-generation technology-sharing initiatives and pioneering diagnostic systems.

In collaboration with all stakeholders—including employees, partners, customers, investors, and local communities—Seegene hereby declares the following Environmental Management Policy to fulfill its social responsibility through robust environmental management practices.

Reduction of Energy Consumption and Greenhouse Gas Emissions

Manage energy use efficiently and reduce greenhouse gas emissions through measures such as adopting environmentally friendly vehicles

Mitigation of Environmental Impact Across the Product Life Cycle

Assess environmental impacts across the entire product life cycle and continuously reduce environmental burdens to advance sustainable environmental management

Minimization of Hazardous Chemical Use and Waste Generation

Minimize the use of hazardous chemicals and the generation of waste in R&D and manufacturing processes

Strengthening of Environmental Targets and Risk Management Systems

Establish environmental goals, monitor performance, and strengthen risk management systems to prevent accidents

Compliance with Environmental Laws and Regulations

Establish compliance systems for major environmental laws and regulations and develop proactive response strategies

Implementation of Environmental Training

Provide environmental training programs to enhance the environmental awareness of all employees

Environmental Review of New Businesses and Investments

Conduct prior environmental reviews of new businesses and investments and incorporate the findings into decision-making
